Revision of Town Brief No. 126: Tashkent

Requirement No.	Item	Requirements
33	Tashkent Aircraft Plant A	This plant is believed to produce components and/or sub-assemblies for Airframes Assembly Plant 84B. Identification of specific products is needed. Report type and number of probable products seen in plant area or in transit from the plant, size and number of observed crates, and give complete description of any uncrated sub-assemblies (such as wing or fuselage sections) seen. Descriptions should include approximate dimensions and sketches, if possible. Note general scale of activity at the plant, including probable number of shifts worked per day and approximate size of labor force.
96 and 97	Tashkent Airframes Plant 84B and Adjoining Plant Airfield	Number and type of aircraft seen in plant area and on plant airfield with special emphasis on any new type of aircraft noted. Description of aircraft, if type is new, with particular note of number and type of engines, shape and placement of wings, tail configuration, and approximate size and dimensions of aircraft. State of completion of all aircraft observed. Note whether aircraft appear to be new or undergoing overhaul or modification. Note
